

**Made in USA**

## TED Series Torque Tester

**“Factory Floor” torque tester with integral display, transducer and mounting bracket**

Full featured easy-to-use bench top torque tester with patented rotary display, three engineering units, Peak, Track and First peak modes for testing all types of torque tools. 1% NIST accuracy. Ranges from 1 in-oz to 2000 ft-lb. Options include rechargeable battery and USB communication port. Will pay for itself in 2 years by saving on outside calibration services. Optional stand available.

## Electronic Dial Torque Wrenches

**Most accurate electronic torque wrench on the market.**

Durable, accurate and functional. Replaces all types of torque wrenches. 1% accuracy standard (.5% available). Models available with rechargeable battery and communication port. Ranges available from 5 in-lb to 2000 ft-lb. Torsion drive design for non-length dependant accuracy. 2500 samples per second for ultra fast and accurate peak torque readings. Torque and angle versions available Q3 2012

## Electronic Torque Wrenches

**Rotary torque wrench allows reading of display from any angle.**

Durable, accurate and functional. Replaces all types of torque wrenches. 2% accuracy standard (1% available). Models available with rechargeable battery and communication port. Ranges available from 25 in-lb to 250 ft-lb Torque and Angle versions available. Exclusive rotary design allows viewing the display at all angles. Interchangeable versions available. Operates on 4-AA batteries.
