

CAT777 INNER WHEEL EXTENSION

MODEL: PIG777 (PINCH INJURY GUARD EXTENSION)

The PIG777 Pinch Injury Guard extension has been designed to overcome the issues associated with the required re-torques on the CAT777 inner rear wheel. As pictured below this task has been a two man job using extra long extensions and a hand torque wrench with safety risks.

The PIG777, extension can be made to suit any Torque Wrench in the market up to 2000ft-lb, it comes complete with Pinch Guard, and tool support for the extension to be supported from a spring balancer and platform, Making this task safer & quicker.

Please contact us for pricing, and check out our website www.national-tools.com.au for the complete range of PIG extension we have to offer
